

# Supply Chain Risk Management

REDUCE THE IMPACT OF UNCERTAINTY | IMPROVE SUPPLY CHAIN RELIABILITY

This program will provide you with an understanding of Supply Chain Risk and how this can be managed so that the impact of risk events on the performance of your business is minimised. Taking action to manage risk will not only provide protection from major risk events, but will also deliver a more reliable supply chain for the business.

A number of tools and models will be provided as part of the workshop. This will assist in identifying the sources of risk as well as guiding you towards the appropriate countermeasures and risk treatments. These tools and models are available for you to take away and use back in your own organisation.

## PROGRAM CONTENT

- The Nature and Structure of the Extended Supply Chain;
- Mapping the Extended Supply Chain to Understand Vulnerability & Risk;
- Sources and Impact of Supply Chain Risk and Vulnerability;
- Managing Supply Chain Risk and Vulnerability;
- Conducting a Supply Chain Risk Assessment;
- Selecting and Applying Countermeasures and Risk Treatment Plans;
- Ongoing Management of Supply Chain Risk and Vulnerability.

## LEARNING OUTCOMES

- Understand how supply chain structure and design can impact on risk and vulnerability
- See how knowledge of your extended supply chain is critical to understanding your risk and vulnerability position
- Acquire an understanding of the sources of risk and vulnerability and the impact these can have on your supply chain
- Understand that supply chain risk and vulnerability CAN be managed
- Develop the ability to conduct a Supply Chain Risk assessment and to prioritise those risks and vulnerabilities for action
- Determine what type of risk treatment (Mitigation, Contingency or Resilience) to apply to which type of risk
- Create the processes, reviews and ongoing action to embed Supply Chain Risk Management in your business and that of your supply chain partners

## RECOMMENDED FOR

Senior Management, Managers and key staff who are responsible for:

- Managing inbound and outbound supply chain activities.
- Selection and management of suppliers, service providers and distribution channel partners.
- Shipping, Transportation and Distribution networks.
- Compliance, Risk Management and Finance.
- Overall business management.

## FORMAT

This is an interactive workshop with group activities focused on using the tools and techniques that will be presented on case studies or your own business.

## ABOUT THE PRESENTER—ANDREW DOWNARD

Andrew Downard is a globally experienced supply chain leader who has operating experience across the Asia Pacific region. Roles have included Materials Manager at Kenworth Trucks, OE Purchasing Manager at Nissan Motor Manufacturing Australia and Regional Supply Chain Director for a Honeywell Joint Venture.

Since leaving his last corporate role, Andrew has been running his own Supply Chain Consulting business helping clients find improvement opportunities in their supply chain operations. Clients in the Automotive, Logistics, Health and Agricultural Production businesses have benefited from his help. Andrew has developed a leading position in Supply Chain Risk Management consulting and education.

Andrew holds a Masters Degree from Monash University in Marketing and a Bachelor's Degree in Economics/Marketing from Swinburne University. He is currently undertaking a PhD by research at Victoria University into the subject of measuring supply chain relationships. He is a past committee member with the Logistics Association of Australia (LAA) and is an accredited facilitator with Mindshop International.
